Frontend: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Vue.js, Tailwind CSS, Bootstrap

Mobile: Flutter, React Native, Expo Router, Dart

Backend: Node.js, Laravel, PHP, Prisma, GraphQL

Database: PostgreSQL, MySQL

Tools: Git, GitHub, Docker, WordPress, OpenAI SDK, Axios, Zod, Visual Studio Code

Core Strengths: API integration, debugging, responsive UI implementation, web development, mobile app development

Professional Experience

Junior Web & Mobile App Developer

July 2025 - Present

Inoasis Tech LLC | Arizona, USA (Remote from Davao City, Philippines)

- Started as a part-time developer and transitioned to full-time after 6 months.
- Contribute to web and mobile projects in a remote startup environment using modern development tools and frameworks.
- Build and update product features, connect frontend interfaces with backend services, and help troubleshoot technical issues.
- Work with technologies such as Next.js, React, Flutter, React Native, Laravel, WordPress, Prisma, PostgreSQL, and MySQL depending on project requirements.

Selected Projects

Web Scraping | *Personal Initiative at Inoasis Tech*

- Built an internal job aggregation and data extraction tool for organized research and reporting.
- Used Next.js, React, TypeScript, Tailwind CSS, Cheerio, OpenAI SDK, Recharts, and Leaflet.

Booking Website & Mobile App | *Project Contributor*

- Contributed to a booking platform across web and mobile as part of an Inoasis Tech project.
- Worked mostly on frontend tasks and supported some backend-related implementation using Vue.js, Laravel, Flutter, and MySQL.

Business App | *Project Contributor*

- Contributed to a large-scale business application for web and mobile under Inoasis Tech LLC.
- Worked on frontend web development and supported full-stack mobile implementation using Next.js, React, TypeScript, Prisma, PostgreSQL, React Native, and Expo.

Food Truck Website | *Project Contributor*

- Helped build a business website for a client project under Inoasis Tech.
- Assisted in implementing website structure and content presentation using WordPress and Elementor.

Local Band Finder | *Solo Developer*

- Built a Flutter mobile app to help users find and book local bands.
- Handled the project independently from planning to implementation, with focus on practical mobile UI and app structure.

Student Registration System | *Frontend Developer*

- Helped build a Java desktop application for student record management.
- Focused on interface implementation, usability, debugging, and testing collaboration.

Additional Experience

Chat Support Admin

2020 - 2023

Discord Server for Digital Product Sales

- Responded to customer concerns through live chat and written support.

- Helped manage conversations, guide users, and handle basic issue resolution in an online sales environment.
